Q/ris 3000 Dictation Workflow Program

The medQ Q/ris Dictation Workflow program is a state-of-the-art dictation system. It is designed to integrate seamlessly with your existing PACS, HIS, Ris, or PMS. This program will create an efficient workflow process, allowing you to produce and distribute accurate reports in minutes.

Key Features and Benefits

- **Single Radiologist Worklist** – Automatically consolidate studies and images from multiple sources into a single, easily managed worklist.
- **Hot-link Integration of PACS Images** – launch the correct series from screens in Q/dictation. No switching to other programs.
- **Improved Radiologist Productivity** – User-defined macros, worklist filters, STAT interrupt management, automatic display of next study, online modification of reports from within the dictation screen, immediate report distribution with digital signature.
- **Dragon NaturallySpeaking™ Speech Recognition** –embedded in our dictation program, the industry leading recognition engine provides the most accurate report generation without transcriptionists, with real time report review and editing from a single screen.
- **Online Patient History with Final Reports** – Directly viewable from the Q/ris 3000 Dictation program.
- **NEW** – Imbedded **Critical Test Results Notification** protocol –fully integrated radiologist workflow with full event tracking and reporting
- **Transcription Workflow Add-on** – Utilize existing on-site or remote transcription services. Selectable on a study-by-study basis.
- **Smart Client Technology** – Anytime, anywhere access via our web protocol.
- **Scalable Solution** – Grows with your practice. There is no limit to number of users.
- **Easily Incorporates into other Q/ris Solutions** – Q/ris 3000 Dictation may be used with our Q/ris 3000 Reading Services System or our full Q/ris 3000 Enterprise RIS Solution. The same screens and workflow eliminates re-training time.
